## BIOMECHANICALLY DESIGNED ORTHOTIC TECHNOLOGY

Our feet were designed to walk on soft, natural surfaces like soil and sand. Yet today we spend most of our time standing, walking and running on unnatural, hard, flat and unyielding surfaces.

This loss of our 'footprint' results in a variety of pain and injuries affecting not just the feet, but the entire body. Unnatural surfaces force our feet to pronate (roll over) to gain ground contact,

which flattens the arches and can disrupt normal knee function and hip alignment and increase pressure on the lower back.

Now recommended by the American Podiatric Medical Association

**ORTHAHEEL HELPS CONTROL ROLLING OVER OF THE FEET (OVER-PRONATION)**

## TECHNOLOGY FEATURES

- Tri-Planar Motion Control™ technology helps reduce pronation and relieve pain by providing correct biomechanical support and stability.
- Podiatrist-designed, built-in orthotic helps prevent over-pronation.
- Flexible and lightweight.

**DR. WEIL Recommends**

Proper foot care promotes optimum health from the ground up.

Andrew Weil, M.D., donates all of his after-tax profits from royalties from sales of Orthaheel products directly to the Weil Foundation, a not-for-profit organization dedicated to supporting integrative medicine through training, education and research.
